how do i communicate this?

give me a
cookie

primitive expressions refer to
concrete, atomic things

expression

me

a cookie

this is what
we say

value

this is what
we mean

expression

me

a cookie

value

type

person

food

sometimes it is useful to associate values
with a broader category called a **type**

expression

me

value

type

person

a cookie

food

this helps us determine the contexts in which it makes sense to use an expression
(e.g., **cookies** tend to be **given**, not to **give**)

what do **computers**
like to talk about?

here are some examples!

expression

value

type

3.14159

3.14159

float

7

7

int

7.0

7.0

float

"hello there"

"hello there"

str

'hello there'

'hello there'

str
